Survey for Implementation of Short-Duration Training Units

Simsea Real Operations
Diarry Heimdal
Head of Human Factors

OBJECTIVES

1. To map the needs and demands of digitalization and adoption of sustainable practices in the maritime sector.
2. Create short-duration training toolkit matching the needs and trends of competences in the maritime sector.
3. To implement and validate the short-duration training toolkit.

Trainers' perspective

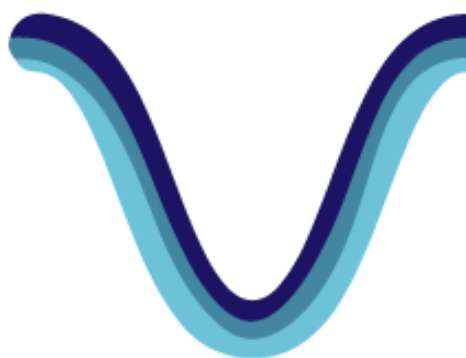

Strengths and Weaknesses

Strengths

- Relatively high response rate in the first survey
- European qualifications framework
- Open-ended and close-ended questions in survey

Weaknesses

- Results based on small sample size not statistically significant
- Relatively low response rate in second survey
- Longitudinal study

Sobre os EEA Grants

Através do Acordo sobre o Espaço Económico Europeu (EEE), a Islândia, o Liechtenstein e a Noruega são parceiros no mercado interno com os Estados-Membros da União Europeia. Como forma de promover um contínuo e equilibrado reforço das relações económicas e comerciais, as partes do Acordo do EEE estabeleceram um Mecanismo Financeiro plurianual, conhecido como EEA Grants. Os EEA Grants têm como objetivos reduzir as disparidades sociais e económicas na Europa e reforçar as relações bilaterais entre estes três países e os países beneficiários. Para o período 2014-2021, foi acordada uma contribuição total de 2,8 mil milhões de euros para 15 países beneficiários. Portugal beneficiará de uma verba de 102,7 milhões de euros.
